

Nysus Solutions Defect Collection System

Additional Nysus Solutions Systems

- Manufacturing Execution Systems
- Production Reporting
- Downtime Tracking
- Corrective Action Request Database (CARD)
- Project Management
- Change Management
- Warehouse Management
- Employee Management
- Preventative Maintenance
- On the Job Training (OJT)
- Wire Harness Testing
- Pick to Light Systems

Advantages of working with us

- Web based systems—accessible from any web enabled PC
- Constant focus on improving systems while maintaining cost savings for our customers
- Ongoing, 24 / 7 support for the life of the system*

* upon payment of yearly maintenance fee

When a defect is created, it is critical to document the occurrence so true root cause analysis can be identified. The Nysus Solutions Defect Collection System can be a critical tool in determining where the issues originate and trends that could be affecting your manufacturing processes.

System benefits include:

- Highlight defect patterns including location
- Provides time stamping of all defect occurrences
- Tracks defect by type or reason code
- Key tool in root cause analysis of defects
- Integrate to Nysus Solutions MES to allow for FTY reporting
- Integrate data with MRP system for scrap transactions via batch flat-file integration or XML web services

Standard reporting features:

- Scatter plot of defect locations by type, part, date, defect, etc.
- First Time (FTC) Yield Reports
- Defect occurrences by line, product type, defect group, defect type, associate or time.
