

Nysus Solutions Pick to Light Systems

As product complexity increases, manufacturers are searching for systems that ensure correct component selection, increase production efficiencies, and simplify operator work assignments. The Nysus Solutions Pick to Light Systems can allow manufacturers to dramatically improve these processes and provide customized products.

Additional Nysus Solutions Systems

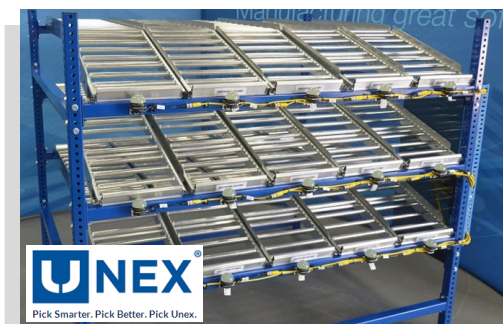

- Manufacturing Execution Systems
- Production Reporting
- Downtime Tracking
- Corrective Action Request Database (CARD)
- Change Management
- Defect Collection
- Employee Management
- Preventative Maintenance
- On the Job Training (OJT)
- Wire Harness Testing
- Warehouse Management
- Robotics

Advantages of working with us

- Web based systems—accessible from any web enabled PC
 - Constant focus on improving systems while maintaining cost savings for our customers
 - Ongoing, 24 / 7 support for the life of the system*
- * upon payment of yearly maintenance fee

Nysus Solutions Pick to Light Benefits:

- ➔ Pick to Light Systems decrease cycle times by reducing the amount of time an operators spends locating the correct component.
- ➔ Pick to Light Systems provide an additional layer of error proofing regarding part selection. Optional pick verification can be obtained using specific verification sensors.
- ➔ Interfaces directly with the Nysus Solutions Manufacturing Execution System to allow for a simple, web based, interface to change system configuration.
- ➔ Various sensor and racking options ensure the correct solution for your application.
- ➔ Optional display screens with pick instructions are ideal for pre-sequencing or kitting operations.

Nysus Solutions is proud to be an authorized UNEX ® distributor for all your carton flow needs.
